

GPA MANAGEMENT

GPA is considered as a strong indicator of a student's aptitude towards different subjects, and it greatly affects what college, university, and which discipline of study he/she might get into. To get admission into a desired institute and in a desired discipline, two things really matter: the performance in standardized entrance tests and the overall GPA of the student. And GPA is affected by a student's score from 9th to 12th grade. Hence, it is important to keep in mind that your score in entrance tests may not be a guarantee of admission to your desired institute. You may need to manage your GPA right from the 9th grade onward.

GPA Management helps students with specific school subjects in both the standard school curriculum and the IB curriculum. Students can learn the material for a class ahead of time, giving them an edge when their school semesters begin. During the school year, they can receive additional reinforcement of the lessons they covered, homework guidance, and take practice tests before their actual tests in school. Subjects include Math, Science, Language Arts, and Social Studies.)

GPA classes for English and Writing Essays

- Studying contemporary and classic literature
- Reading variety of material
- Developing analytical skills
- Writing in a mature and literary style
- Building diverse vocabulary

Whereas, GPA classes for other subjects such as Physics, Chemistry, Biology, Mathematics, and Social Science include studying course-material from school or IB curriculum, students can make personalized study plans focusing on a particular subject, or even particular topics of a subject where they need extra help.

You will get full guidance about what GPA score you should target to achieve your admission goal, what electives you should choose, what is the cut-off GPA for given discipline, and so on.
